MICHAEL SAN DIEGO

Senior Software Engineer
(iOS Developer)

Personal Information

(+63) 917 506 25 48

micsndg@gmail.com

Education

Bachelor of Science in Computer Engineering, 2015

Asia Pacific College

Key Skills

- Objective-C, Swift
  UIKit, SwiftUI
- RESTful API's & URLSession
- Core Data & Realm
- Azure DevOps
- Git & Github
- XCode & Interface Builder
- Unit Testing: XCTest
- Firebase & Push Notifications
- AppStore Connect & Testflight
- Cocoapods & Swift Package Manager
- Data Analytics
- CI/CD, Fastlane
- Combine
- Swiftlint, Accessibility
- MVVM, MVC Architecture

Soft Skills

- Problem Solving & Debugging
- Code Review & Collaboration
- Agile/Scrum methodology
- Cross-functional communication
- Time management
- Continuous learning
- Technical documentation

Professional Summary

An innovative and results-driven Senior iOS Developer with over 12 years of experience designing, developing, and deploying high-performance mobile applications for global clients. I bring deep expertise in Swift, SwiftUI, Objective-C, and modern iOS architectural patterns including MVVM-C and MVC, with a proven track record of leading applications from concept through App Store release. I excel in integrating complex APIs and SDKs, collaborating effectively within Agile/Scrum environments, and driving continuous improvement in app stability, performance, and user experience. I was also recognized for mentoring junior engineers, promoting engineering best practices, and fostering technical excellence across teams.

Professional Experience

Cognizant Philippines
Oct 2023 – May 2026

Senior Software Engineer

- Led the iOS development team, driving technical discussions and ensuring alignment with architectural best practices.
- Collaborated closely with Android counterparts to ensure parity across both mobile platforms in design, behaviour, and implementation.
- Provided mentorship and technical guidance to team members, promoting consistency, code quality, and maintainability.
- Facilitated and managed Scrum activities, including daily stand-ups, sprint planning, backlog grooming, and retrospectives.
- Ensured clear alignment on sprint deliverables through proactive communication and coordination among stakeholders.
- Monitored sprint progress, resolved blockers, and maintained accountability for deliverables and timelines.
- Acted as Incident Support Manager, overseeing production issues, coordinating quick resolutions, and ensuring minimal impact to live users.
- Handled Production Release Management, ensuring smooth app deployments, version tracking, and collaboration with QA and DevOps teams.
- Utilized GitHub Copilot to enhance code quality through automated analysis, development and maintenance of unit tests, and serving as an initial code reviewer.

Highly Succeed Inc
July 2020 – Sept 2023

Lead Mobile Developer/ Project Manager

- Progressed from Senior iOS Developer to Lead Mobile Developer / Project Manager, overseeing mobile application development, coordinating project execution, and aligning technical deliverables with client requirements and business objectives.
- Led the end-to-end development of two iOS applications from the ground up: a consumer-facing healthcare application for doctor

Languages

- English
- Filipino

video consultations and a dedicated doctor application to support consultation workflows.
● Collaborated closely with clients, third-party vendors, and cross-functional teams to clarify requirements, evaluate third-party products, and translate integration specifications into practical mobile application features.
● Integrated third-party hardware and health-monitoring devices, including smartwatches, to capture and display users' health-related data within the application ecosystem.
● Oversaw feature implementation, technical problem-solving, and project coordination across development activities, ensuring alignment between client expectations, product requirements, and delivery timelines.
● Supported additional mobile projects through ongoing maintenance, bug fixes, performance improvements, and feature enhancements to maintain application stability and reliability.

TOWA Technologies
July 2019 – June 2020

Senior iOS App Developer
• Built the company's iOS application from the ground up, translating product requirements and designs into functional mobile features.
● Established the application's architecture and core features to support initial release and future enhancements.
● Collaborated with design, backend, and QA teams to ensure seamless feature implementation and API integration.
● Resolved technical challenges and integration issues to deliver features aligned with business requirements.
● Managed the iOS development lifecycle, including implementation, testing, bug fixing, and ongoing improvements.

Additional Relevant Experience
Mar 2014 – July 2019
Sunrise Ultimax Asia Inc.
Gumnut Systems International
Innovathink Corp.
Nessotech Inc.

iOS App Developer / Senior iOS App Developer
• Developed, deployed, and maintained iOS applications for iPhone and iPad, including Pinoy Fitness and Moneygment.
• Implemented features, analyzed client requirements, resolved bugs, and optimized application performance.
• Collaborated with development teams and managed iOS provisioning profiles and certificates.
