

PERSONAL INFORMATION

Name	Michael San Diego
Contact number	09175062548
Email	micsndg@gmail.com
Current Role	Senior Software Engineer (Native iOS Developer)

SUMMARY

An innovative and **results-driven Senior iOS Developer** with over 12 years of experience designing, developing, and deploying high-performance mobile applications for global clients. I bring deep expertise in Swift, SwiftUI, Objective-C, and modern iOS architectural patterns including MVVM-C and MVC, with a proven track record of leading applications from concept through App Store release. I excel in integrating complex APIs and SDKs, collaborating effectively within Agile/Scrum environments, and driving continuous improvement in app stability, performance, and user experience.

I was also recognized for mentoring junior engineers, promoting engineering best practices, and fostering technical excellence across teams. I actively leverages AI-assisted development tools such as GitHub Copilot to accelerate development, enhance code quality, and improve maintainability—embracing modern, efficient, and scalable mobile engineering practices.

SKILLS SUMMARY

Front-end Skills	iOS (Objective-C, Swift, SwiftUI)
Back-end Skills	Postman, REST
Database	MySQL, Realm, CoreData
Other Skills	Azure DevOps, Azure app service, Github, Github CoPilot, Git, CI/CD, Xcode, Visual Studio Code, XCTest, XCUITest, SourceTree, Confluence, Jira, Sonarqube, Apple Appstore, Google Playstore, Firebase, Mixpanel, Claude, Gemini, Prompt and Context Engineering

Skill Matrix

Languages/Frameworks/Libraries, Databases, Dev tools, Business Domain Knowledge, Management Skills	Expert Level (1-5) 1 = New, 5 = Expert	Year Exp	Last used (Year)
iOS(Objective-C)	4	6 years	2026
iOS(Swift)	4	9 years	2026
iOS(SwiftUI)	3	4 years	2026
GitHub	4	11 years	2026
AGILE	3	6 years	2026
Sonarqube	3	2 years	2026
Azure DevOps	2	2 years	2026
Optimizely	2	2 years	2025
Swift Package Manager	2	3 year	2026
API/SDK Integrations	4	11 years	2026
Firebase	3	6 years	2026

SOLID	4	6 years	2026
Github CoPilot	3	1 year	2026

PROFESSIONAL EXPERIENCE

Summary

Cognizant – On Bench March 2026 – May 2026

- Focused on continuous upskilling in emerging technologies, with emphasis on AI-driven development and modern engineering practices.
- Completed structured training programs in prompt engineering, enhancing ability to design effective and context-aware AI interactions.
- Gained hands-on experience with tools such as GitHub Speckit, applying AI-assisted workflows to improve development efficiency and code quality.
- Participated in Claude Foundations training, strengthening understanding of large language models and their practical applications in software development.
- Explored integration of AI tools into development lifecycle, including code generation, testing support, and documentation improvements.
- Built prototype projects leveraging AI capabilities to reinforce learning and evaluate real-world use cases.
- Stayed up to date with industry trends in AI and mobile development, ensuring readiness for future project assignments.

Technology: GitHub Speckit Driven Development, GitHub Copilot, AI, Agile/Scrum, Git, VSCode, Docker

Cognizant – Multinational Airlines Company - Senior Software Engineer October 2023 – March 2026

- Led the iOS development team, driving technical discussions and ensuring alignment with architectural best practices.
- Collaborated closely with Android counterparts to ensure parity across both mobile platforms in design, behaviour, and implementation.
- Provided mentorship and technical guidance to team members, promoting consistency, code quality, and maintainability.
- Facilitated and managed Scrum activities, including daily stand-ups, sprint planning, backlog grooming, and retrospectives.
- Ensured clear alignment on sprint deliverables through proactive communication and coordination among stakeholders.
- Monitored sprint progress, resolved blockers, and maintained accountability for deliverables and timelines.
- Acted as Incident Support Manager, overseeing production issues, coordinating quick resolutions, and ensuring minimal impact to live users.
- Handled Production Release Management, ensuring smooth app deployments, version tracking, and collaboration with QA and DevOps teams.
- Utilized GitHub Copilot to enhance code quality through automated analysis, development and maintenance of unit tests, and serving as an initial code reviewer.

Technology: Swift, SwiftUI, Azure DevOps, Adobe Analytics, Global Distribution Systems (Sabre), RESTful APIs, Git, Xcode, Agile/Scrum, Github Copilot

Appetiser App – Senior iOS Developer July 2020 – Sept 2023

- Designed and developed multiple iOS applications from the ground up using **Swift** and **SwiftUI**, following **MVVM-C** architecture for scalable codebases.
- Collaborated with designers, backend developers, and QA teams to ensure adherence to company standards and a seamless user experience.
- Integrated third-party SDKs and APIs, optimizing data handling and improving app performance.
- Contributed to **R&D initiatives**, evaluating new frameworks and tools for potential adoption.
- Led feature implementations and mentored junior developers on best practices and architectural design.

Technology: Swift, SwiftUI, Gitlab, ClickUp, Xcode, Agile, Git, RESTful, Combine

TOWA Technologies – Senior iOS Developer, July 2019 – June 2020

- Delivered and maintained consumer-facing apps ensuring alignment with business objectives and design standards.
- Led app maintenance initiatives to improve stability and reduce crash rates.
- Collaborated with UX teams using wireframes and flow diagrams to refine designs and optimize usability.

Technology: Swift, VIPER, MVVM-C, Trello, Gitlab

Nessotech Inc. – Senior iOS Developer, January 2018 – July 2019

- Developed and published multiple applications including **Pinoy Fitness** and **Moneygment**, integrating payment and real-time data features.
- Worked closely with clients to translate business requirements into technical solutions.
- Maintained existing applications, adding new features and improving performance.

Technology: Objective-C, Swift, PayPal, BayadCenter

Innovathink Corp. – iOS Developer, July 2017 – January 2018

- Maintained and supported existing iOS apps while implementing performance enhancements.
- Identified bottlenecks, fixed bugs, and improved overall responsiveness.

Technology: Objective-C, Swift

Gumnut Systems International – iOS Developer, October 2015 – July 2017

- Managed developer certificates and provisioning profiles for app deployment.
- Implemented new app features, optimized performance, and supported multiple client applications.
- Collaborated closely with QA and support teams to resolve issues and maintain stability.

Technology: Objective-C

Sunrise Ultimax Asia Inc. – iOS Developer, March 2014 – March 2015

- Built and deployed native iPhone and iPad applications.
- Worked with cross-functional teams to design and implement user-friendly interfaces.

Technology: Objective-C, BayadCenter
